A Short Profile

Previous work experience:

I finished my secondary school certificate in July 2015. Afterwards I was an exchange student in the USA and visited the Marlboro Central High School. There I learned to speak a fluent English and as a member of the drama club I learned how to act and also started working with crafts. During this time I enjoyed travelling and meeting new friends.

I finished my Abitur (High School diploma) on the 28th of July in 2019.

Furthermore, I completed my training as a design assistant on the 30th of October in 2019. Here I gained my practical experience during a 3-month period internship in the advertising agency Com,ma. During this time I was allowed to work independently on the flyers, roll-ups, business cards and posters as well as invitation cards and to create banners according to the customer specifications.

Afterwards, I worked at the MIOS design agency for about nine months for a big supermarket company (EDEKA). Working closely together with a client (EDEKA)

I was able to create the advertisements as well as customized flyers, posters and post-cards.

Current experience:

In summer of 2020 I applied for the Digital Media and Experiment class at the Fachhochschule Bielefeld. For my studies I work in 2D and 3D applications. My skills are defined to the Adobe Creative Cloud just as Cinema 4D and I also work with some HTML and CSS for smaller personal project. In another personal projects for a natural garden in which my grandma participates, I have already successfully created invitations and flyers.

My work philosophy:

I think one of the most important benefactor to successful work in design is the passion and the eye for detail. But above all the realization of the customers wishes and his satisfaction is my priority.

More about me:

Since eleven years, I am used to the English language. During the Business School I attend to a class of the Japanese language for three years.
